PROFILE

Currently pursuing a degree in Computer Engineering, I am a passionate self-taught developer with a vision of becoming a Software Engineer. My curiosity about software development drives me to explore and learn independently. I am dedicated to crafting efficient, innovative solutions that contribute to the digital world.

WORK EXPERIENCE

Personal Portfolio Website

Role: Designer and Developer

- Built a personal portfolio website using HTML, CSS, and JavaScript to showcase projects and technical skills.
- Created a dynamic portfolio to display academic and personal projects.
- Utilized GitHub Pages for hosting, ensuring seamless deployment and maintenance of the website.
- URL: https://ivanvargas21.github.io/vargasivan-portfolio/

Sales and Inventory System for Kandyland

Role: Developer

- Designed and implemented a web-based sales and inventory system tailored for a small business using PHP, JavaScript, and MySQL.
- Enhanced user functionality by adding custom features based on store requirements.
- Utilized XAMPP for local development and testing.

Church Webpage Development

Role: Front-End Developer

- Collaborated on building a React-based website for Christ Fellowship Church.
- Designed and developed a Donation Section allowing users to input their contact information, triggering an automated email confirmation using EmailJS.
- Created a chatbot to engage visitors and provide information about the church.
- Designed and implemented a carousel image gallery, enhancing the user interface and overall experience.
